Stroud Area Community Energy Network meeting

The Mortimer Rooms, Nailsworth, Wednesday 13th March, 6:30pm

[Stroud Area Community Energy Network](#) and Transition Stroud's [Climate Action Network Forum](#) are running an information and consultation event in March to help identify and launch more renewable energy projects across Stroud District. We are working with communities across the area to support ambitious energy projects that directly benefit local residents, explore different models, and make the most of public assets. At this event you will hear from local community energy experts and find out how projects like the recently launched solar roof at [Minchinhampton Community Hub](#) came about.

This first event is aimed at volunteer-led Climate Action Network groups, but Councillors are also welcome to attend on behalf of their Towns and Parishes.

Please [register attendance](#) in advance so we can plan for numbers.
